DETAILED ACTION

This Office action is in response to the applicant amendment filed on 12/1/2004.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17, 19, and 37-40, 42-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The cited limitation "a corridor formed on said second level; and respective separate pathways between said corridor and said first level, said second level and said third level to provide for access between said corridor and each of said dwelling units on each of said levels, respectively, without passing through another dwelling unit" is confusing because it's not clear that how occupant would pass from one unit to another unit without passing through another unit unless every unit has it own corridor privately interconnected. However, in this particular case, there is only one corridor formed on the second level.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best understood, claims 17, 19, and 37-40, 42-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Zeckendorf (US 2,698,973).

Zeckendorf teaches multistory building structure comprising at least one multistory module comprising a first level including multiple dwelling units (figs. 5 and 6) and extending between one sidewall 12 or 26 of the module and an opposite sidewall, a second level of the module including plural dwelling units thereon and occupying at least a portion of the second level, at least a third level of the module including multiple dwelling units disposed thereon, a corridor 31 formed on one of modular level and providing pathway and access by elevators 46, stairways 47 31 and a ground level G.

Allowable Subject Matter

Claims 1-16, 20-36, and 46 were previously allowed.

Response to Arguments

Applicant's arguments with respect to claims 17 and 19, and 37-40, 42-44 have been considered but not persuasive because the claimed limitation not clear and confusing (see above rejection). Therefore, as best understood the previous office action is still met the applicant's claimed invention and will be maintain.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3635

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
